

Patient Name: _____	Patient DOB: _____
Patient Phone: _____	Referral Date: _____

INTERVENTIONAL ONCOLOGY PROCEDURES:

- Radiofrequency Ablation soft tissue tumors
- Chemoembolization
- Porta-a-Cath placement and venous access
- RF ablation for painful metastatic spinal tumors & long bones
- Tunneled pleural and peritoneal catheters for malignant ascites/effusion

SPINE INTERVENTIONS:

- Kyphoplasty/Vertebroplasty
- RF ablation for painful metastatic spinal tumors & long bones
- Mild procedure

GENERAL INTERVENTIONAL TREATMENTS:

- Angiography
- Angioplasty
- Embolization
- Radiofrequency Ablation (RFA)
- Stenting
- Thrombectomy

GASTRO-INTESTIONAL:

- Percutaneous Transhepatic Cholangiograms (PTCA)
- Percutaneous Transhepatic Biliary Drainage
- Mesenteric and Celiac Angiography and Stenting
- Paracentesis
- Port Placement/venous access.
- Percutaneous Endoscopic Gastronomy (PEG)
- B.A.E.

BIOPSIES:

- Liver
- Kidneys
- Thyroid
- Lymph Nodes
- Other

NEPHROLOGY AND RENAL INTERVENTIONS:

- Renal Artery Stenting
- Renal Cyst Drainage
- Dialysis Catheter Placement

UROLOGICAL TREATMENTS:

- Prostate embolization

WOMEN'S HEALTH:

- Uterine Fibroid Embolization

CENTRAL VENOUS ACCESS CATHETER:

- Port Placement
- Tunneled Hickman/PICC
- PICC

OTHERS:

- Inferior Vena Cava Filter Placement and Retrieval

VEIN TREATMENTS:

- Varicose veins management
- Endovenous laser ablation of Saphenous veins
- Laser treatment of spider veins of facial telangectasias
- Sclerotherapy
- Chemical ablation of branch varicosities with Varithena
- Venaseal treatment
